

Institute of National Planning

INP

معهد التخطيط القومي
INSTITUTE OF NATIONAL PLANNING

The Institute of National Planning was established in 1960 as a public institution with an independent legal nature. It is dedicated to scientific activities that enhance the approach and concept of scientific planning in Egypt. It aims to promote and establish planning principles and practices across all national institutions and to disseminate a culture of planning within Egyptian Society.

In 2015, Law No. 13 was enacted concerning the Institute of National Planning, reinforcing its status as an independent public entity dedicated to scientific endeavors and solidifying its position as a leading institution in planning and development.

The law underscored the Institute's mission to advance research and studies supporting the formulation and implementation of national development plans.

It also emphasized the importance of exploring the scientific principles and methodologies of planning and development to equip planners, decision-makers, and policymakers at all levels with strategic insights and alternative solutions, while promoting awareness and disseminating knowledge on comprehensive and sustainable development across society.

Board of Directors

Dr. Ahmed Rostom

Minister of Planning, Economic Development,
and the Chairperson of INP

Prof. Ashraf El-Araby
President of INP

External Board Members

Prof. Maged Ibrahim Osman
Director of the Egyptian Center for
Public Opinion Research (Baseera);
Former Minister of Communications
and Information Technology

Prof. Saad Zaki Nassar
Professor at the Faculty of Agriculture,
Cairo University and Former
Al-Fayoum Governorate

Major Akram Ahmed Al-Gohary
President of the Central Agency for
Public Mobilization and Statistics

Mr. Ibrahim Ali Sarhan
Chairman and Managing
Director of e Finance

Prof. Mostafa Refaat Ismail
Secretary General of the
Supreme Council of Universities

Mr. Yasser Samir Sobhy
Deputy Minister of Finance
for Financial Policies

Prof. Walid Khaled El-Zawawy
Secretary manager of the
Council of Research Centers
and Institutes

Prof. Hala Mohamed Sultan
Head of the Economics
Department, Faculty of
Economics and Political
Science, Cairo University

Mr. Hesham Hussein El-Khazindar
Co-founder of Qalaa Holdings for
Financial Consulting

Internal Board Members

Prof. Hanan Ragaee Abdel Latif
Director of Agricultural
Planning and Development
Center

Prof. Khaled Zakaria Amin
Director of Macro-economic
Policies Center

Prof. Khaled Abdel Aziz Attia
Vice President of INP for
Research & Post-Graduate
Studies

Prof. Ashraf Salah El-Din Saleh
Vice President of INP for Training,
Consultancies & Community
Service

Dr. Heba Saleh Mogheeb
Director of Industrial Planning
and Development Center

**Prof. Basma Moharram
El-Haddad**
Director of Planning
Techniques Center

Prof. Sahar Ibrahim El-Bahaee
Director of Environmental

Center

Prof. Mageda Imam Hassanein
Director of Social and Cultural
Planning Center

Dr. Ahmed Rashad El-Sherbiny
Director of International
Economic Relations Center

Prof. Amal Zakaria Amer
Director of Regional
development Center

معهد التخطيط القومي
INSTITUTE OF NATIONAL PLANNING

Vision

A leading and influential national and regional think-tank with recognized international distinction.

معهد التخطيط القومي
INSTITUTE OF NATIONAL PLANNING

Mission

Providing competitive, evidence-based research, training, education, consultancy, and community services that strengthen societal capabilities and enhance the **effectiveness** of policymaking and decision-making in the fields of planning and development.

Values

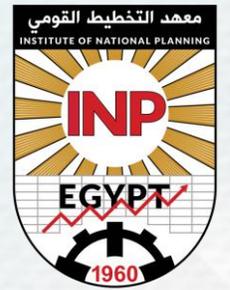

Diversity

Innovation

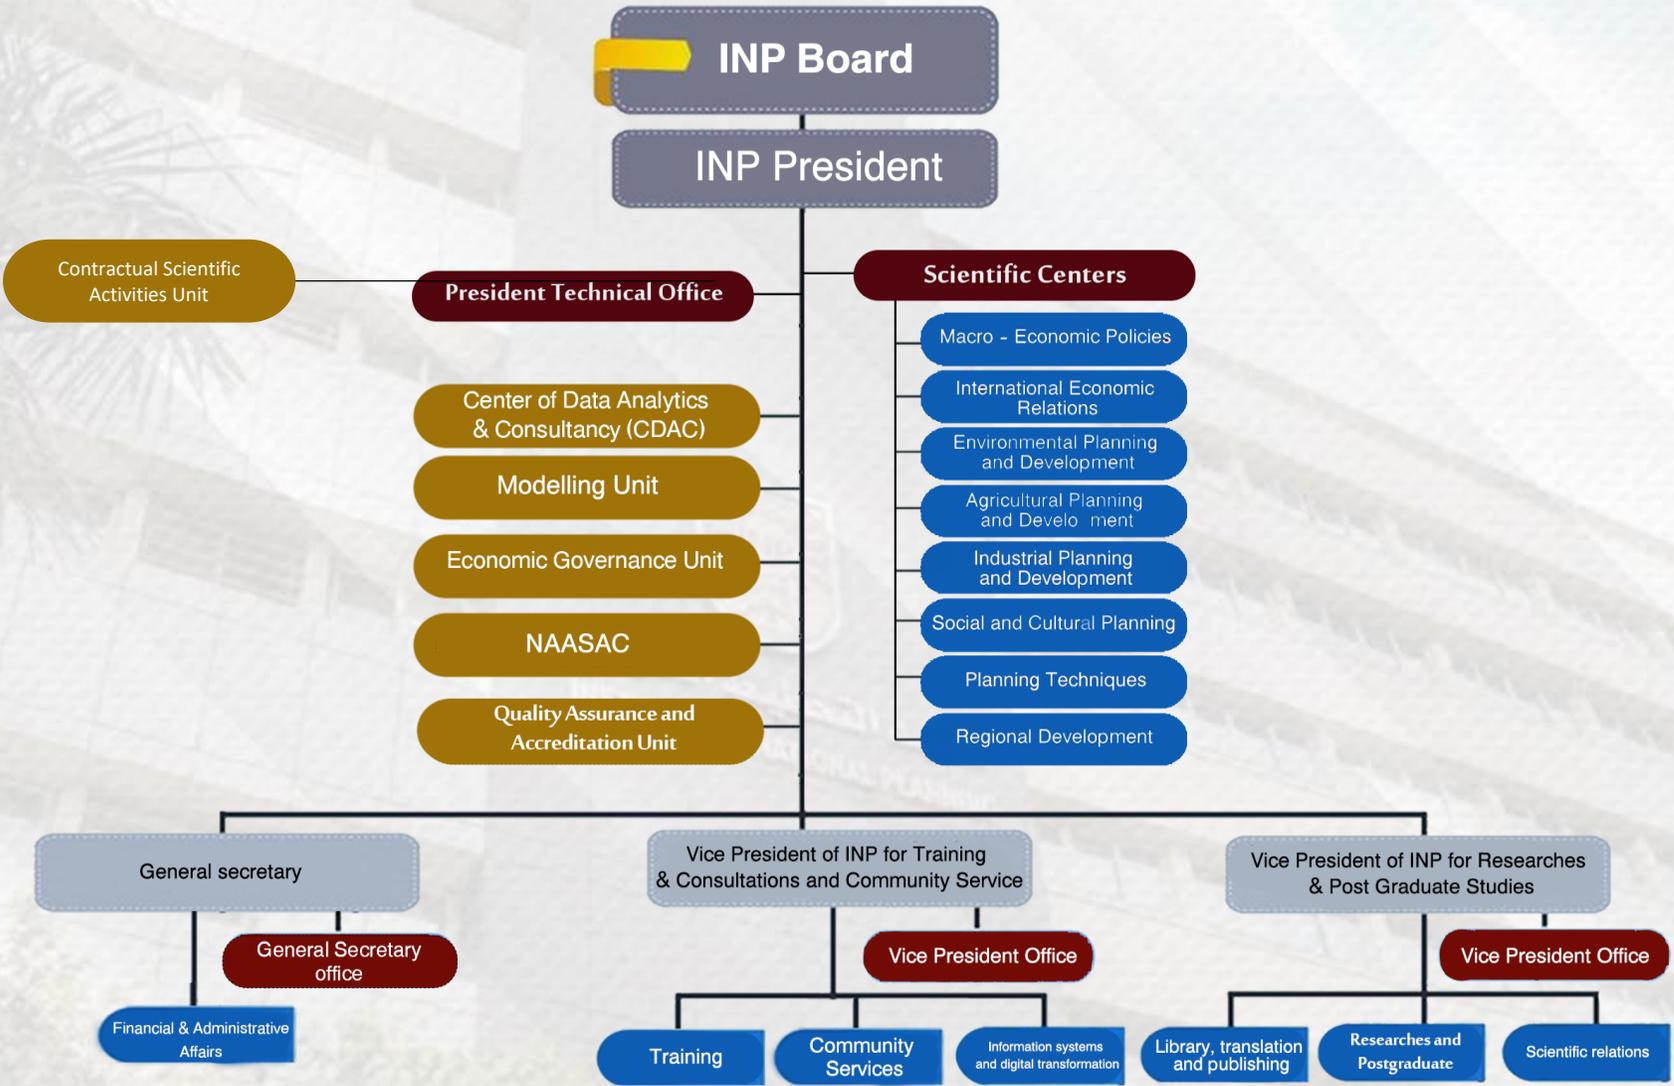

Sustainability

Strategic Objectives

1. Improving the quality of evidence-based research activities and envisioning the future in line with national priorities and global developments.
2. Enhancing the Institute's role in capacity-building at the central and local levels.
3. Providing accredited academic and professional postgraduate programs in the fields of planning and sustainable development, aimed at producing qualified personnel to support policy-makers and decision-makers at all levels.
4. Expanding INP's competitive consultancy services and diversifying them to support governmental, private, civil, and international entities.
5. Enhancing INP's national, regional, and international position through effective partnerships in its fields.
6. Developing human and financial capital within INP and enhancing institutional and technological frameworks to promote activities related to financial sustainability, quality, governance, and community services.

The Scientific and Administrative Structure of INP

INP scientific centers encompass a wide range of levels, economic sectors, and domains of sustainable development.

Scientific Centers

International Economic Relations

Scientific Departments:

- Foreign Trade and International Marketing
- International Finance and Foreign Investment
- Economics of International Services
- International and Regional Blocs and Organizations

Macro-economic Policies

Scientific Departments :

- Macroeconomic Planning
- Fiscal and Monetary Policies
- Consumption and Domestic Trade
- Labor Market

Regional Development

Scientific Departments :

- Regional Planning
- Workforce and Population Planning
- Geographic Information Systems (GIS)
- Local Administration and Decentralization

Industrial Planning and Development

Scientific Departments :

- Industrial Development Policies
- Development Policies for Productive Services
- Management and Evaluation of Industrial and Service Projects
- Small and Medium Enterprises (SMEs)

Scientific Centers

Agriculture Planning and Development

Scientific Departments:

- Analysis of agricultural policies
- Resource management and evaluation of agricultural projects
- Marketing and agricultural information systems
- Rural development and agricultural cooperation

Social and Cultural Planning

Scientific Departments:

- Social and cultural issues for development and planning
- Human resource development and management
- Planning of social and cultural services

Environmental Planning and Development

Scientific Departments:

- Environmental planning
- Environmental economics
- Natural resource management
- Environmental accounting

Planning Techniques

Scientific Departments:

- Models building
- Applied statistics and econometrics
- Information systems and decision support
- Operations research
- Future studies

Scientific Centers

International Economic Relations

The center is a prominent and dynamic entity that addresses issues related to foreign trade, international finance, international services, international and regional agreements and treaties, and international economic organizations, supporting planning and development initiatives at national, regional, and international levels.

Moreover, it is a leading center in the study of international economic relations, conducting research, studies, and scientific reports, as well as engaging in capacity-building, providing consultancy services, and offering community service activities within its areas of expertise. These efforts are designed to meet the needs of key partners at local, regional, and international levels, thereby contributing to the attainment of sustainable development goals.

Scientific Departments

- International trade and marketing
- International finance and foreign investments
- Economics of international services
- Blocs and international and regional organizations

Scientific Centers

Macro-economic Policies Center

The center is a leading entity in the study and analysis of local, regional, and global economic planning and development issues. It formulates economic policies grounded in robust scientific principles, aimed at achieving developmental goals and supporting decision-makers.

The center undertakes research, studies, and reports; organizes conferences and seminars; builds capacity; offers consultations; and engages in community service activities focused on macroeconomic policies and large-scale development and planning issues. It adheres to rigorous quality standards to meet the needs of key stakeholders at various levels, thereby contributing to the improvement of the planning process and enhancing developmental performance.

Scientific Departments

- Macro-economic planning
- Fiscal and monetary policies
- Consumption and domestic trade
- Labor market

Scientific Centers

Regional Development Center

The center concentrates its efforts on advancing planning and monitoring methods at the regional and local levels, drawing on the best global practices and developments.

This approach supports the enhancement of planning and monitoring activities at both the macro and sectoral levels, as well as across all government and non-governmental agencies and institutions within the country.

Scientific Departments

- Regional planning
- Labor force and population planning
- Geographic information systems

Scientific Centers

Industrial Planning and Development Center

The center plays a crucial and enduring role in industrial planning and development at both the national and regional levels, while fostering effective communication with local and international stakeholders on these matters.

It is recognized as a prominent center for studying industrial development issues, planning and managing industrial projects, advancing productive and service-related sectors, supporting small and medium-sized enterprises, and promoting entrepreneurship and innovation. These efforts aim to enhance research activities, planning studies, industrial policy formulation, decision-making processes, capacity building, and the achievement of sustainable development goals within the industrial sector.

Scientific Departments

- Industrial development policies
- Policies for the development of productive services
- Management and evaluation of industrial and service projects
- Small and medium-sized enterprises

Scientific Centers

Center for Agricultural Planning and Development

The center specializes in studying agricultural and rural development policies, the development of fishery resources, water and irrigation issues, marketing, agricultural cooperation and extension, as well as the management and evaluation of agricultural projects. It also conducts research on agricultural planning methodologies and agricultural information systems.

The center contributes to promoting the concept of agricultural planning and development to enhance agriculture's contribution to the national economy. It provides decision-makers and stakeholders with plans, studies, consultations, and capacity-building opportunities through training and education.

Scientific Departments

- Analysis of agricultural policies
- Resource management and evaluation of agricultural projects
- Marketing and agricultural information systems
- Rural development and agricultural cooperation

Scientific Centers

Center for Social and Cultural Planning

The center aims to establish itself as a leader in the social and cultural fields by providing scientific research, consultations, and community service. In doing so, it seeks to become a scientific landmark that fosters creativity and excels in competitiveness at local, regional, and international levels, with a vision extending through 2035.

The center is committed to offering high-quality services and activities in the social and cultural domains by implementing academic programs and research projects of the highest standards. These services and activities are designed to contribute to societal advancement and improvement, leveraging the center's distinguished and diverse areas of expertise.

Scientific Departments

- Social and cultural issues for development and planning
- Human resource development and management
- Planning of social and cultural services

Scientific Centers

Center for Environmental Planning and Development

The center plays a significant and sustainable role in addressing environmental planning and development issues at the national level, while also ensuring effective internal and external communication.

It holds a distinguished position both locally and regionally in the fields of environmental planning, natural resource management, environmental economics, and environmental accounting. This is achieved through research, education, training, consultations, and community and environmental services, employing the best scientific methods and practices. Additionally, the center fosters effective local and regional partnerships, all of which contribute to the achievement of sustainable development goals.

Scientific Centers

- Environmental planning
- Environmental economics
- Natural resource management
- Environmental accounting

Scientific Centers

Planning Techniques Center

The center excels in the development and application of both quantitative and qualitative scientific methods to support planning and development activities, while ensuring effective communication of these efforts with stakeholders locally and internationally.

It is a leader in utilising and advancing modern methods and scientific tools in statistics, modeling, informatics, operations research, and econometrics at the macro, sectoral, and micro levels. These capabilities support research activities, planning studies, policy formulation, decision-making processes, capacity building, and the achievement of the Sustainable Development Goals.

Scientific Centers

- Model building
- Applied statistics and econometrics
- Information systems and decision support
- Operations research
- Future studies

Supporting Centers and Units

1

Quality Assurance and Accreditation Unit

Goal:

- To meet the local and international quality and governance standards and requirements for the Institute's programs and services.
- To provide essential databases that support quality and governance activities at the Institute.
- To develop partnerships with relevant think tanks locally and internationally to enhance the Institute's quality and governance efforts.

Tasks:

- Developing practical policies for quality and governance that align with the Institute's vision, mission, and objectives.
- Preparing appropriate guidelines to support the quality and governance activities at the Institute.
- Preparing specialized studies and reports to support the unit's activities.
- Providing technical support in the field of quality and governance to scientific centers and administrative units.

2

Contractual Scientific Activities Unit (Specialized Unit)

Goal:

The unit aims to support the Institute in achieving its mission in the field of planning and development.

Tasks:

- Designing and implementing specialized training and professional programs aligned with the Institute's objectives and activities.
- Providing scientific consultations to the Institute and other entities.
- Conducting targeted scientific research within the Institute's areas of focus.
- Sharing expertise with similar organizations both locally and internationally through seminars, workshops, and conferences.

3

Center of Data Analytics and Consultancy (CDAC)

Goal:

The center aims to provide specialized economic, financial, administrative, and statistical consulting services in the region, based on reliable statistical and informational indicators. This positions it as an effective, influential, and trusted resource for decision-makers both locally and internationally. The goal is to support the Egyptian-African economy by facilitating proper planning efforts to achieve sustainable development goals.

Tasks:

The center offers a comprehensive set of solutions with a positive impact through:

- **Intelligence Services:** Data analysis, forecasting, and estimation.
- **Consultancy Services:** Providing administrative, financial, and economic consulting.

4

North African Applied Systems Analysis Center (NAASAC)

Goal:

The center was established as a collaborative initiative between INP, the Academy of Scientific Research and Technology (ASRT), and the International Institute for Applied Systems Analysis (IIASA) in Vienna. Its goal is to build capacity in North Africa for the application of systems thinking and systems analysis, while fostering a culture of evidence-based decision-making and promoting this culture across the region.

Tasks:

Promoting systems thinking to address complex, real-life problems and demonstrating how various modeling techniques can be used to tackle these issues through:

- **Capacity Building:** Offering a System Analytics Diploma.
- **International Publication.**
- **Awareness:** Raising awareness about the importance of systems thinking and analysis.
- **Participation:** Engaging in numerous international seminars, conferences, and workshops to highlight the practical applications of systems analysis in addressing real-world challenges.

5

The Economic Governance Unit

Goal:

The unit aims to develop national expertise capable of constructing and applying simulation models using the System Dynamics methodology to analyze complex dynamic economic, social, and environmental issues in light of alternative future scenarios. This effort is intended to support policymakers and planning officials across all governance levels.

Tasks:

- Studying and identifying complex and dynamic economic and social challenges in Egypt through modeling, simulation, and analysis, linking them to governance components.
- Analyzing national development policies using System Dynamics methodology and tools.
- Leveraging local, regional, and international expertise, integrating stakeholder opinions into the economic modeling and governance framework.
- Developing System Dynamics models and applying them within the national context to assist the government in addressing development challenges and implementing effective governance.
- Building models to analyze long-term development outcomes, generating various scenarios and alternatives essential for their implementation.
- Building capacity and preparing the necessary cadres to design more effective developmental policies.

6

The Modeling Unit

Goal:

The unit aims to enhance capacity building and skills in quantitative modeling, with the goal of applying these models in the research outputs produced by unit members. Additionally, the unit seeks to collaborate with Arab and international institutes to conduct joint training and research activities.

Tasks:

Training Activities:

- Enhancing and building the quantitative skills and capacities of unit members.
- Collaborating with Arab and international institutes on training and joint research activities.
- The unit was established in collaboration with the Arab Planning Institute in Kuwait on 5th January 2023.

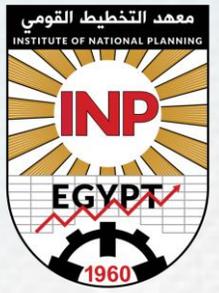

Research Activities:

The Modeling Unit aims to build an econometric model for the Egyptian economy and conduct various research studies, including, for example:

- Assessing the impact of currency devaluation on the Egyptian economy and household livelihoods.
- Analyzing public investment spending and its impact on private sector investment at the sectoral level in Egypt.
- Exploring GDP deflation: methodology and application.

Report on Deepening Local Manufacturing in Egypt

The Institute initiated an ambitious project entitled “Deepening Local Manufacturing in Egypt”, representing the culmination of a nearly three-year research endeavor. Launched in the summer of 2023, the project began in the summer of 2020 and is grounded in the findings of 28 working papers developed within its framework. It also draws upon insights gathered through numerous workshops, seminars, academic meetings, field visits, and other relevant sources of information and dialogue.

The Institute launched, for the first time, three significant reports that mark a major step in advancing its research and policy impact:

Carbon Footprint Report 2021

Report on Greening the Institute Building 2023

Sustainability Report 2023

Scientific Events

First: Annual International Conferences of the Institute of National Planning

The Institute of National Planning holds an annual international conference addressing a key thematic issue each year. These conferences serve as a platform for academic exchange, policy dialogue, and knowledge dissemination in the field of planning and sustainable development. During the period from 2017 to 2024, the Institute organized the following conferences:

- Health and Sustainable Development – June 2024
- Governance and Sustainable Development – June 2023
- Climate Change and Sustainable Development – March 2022
- Digital Economy and Sustainable Development – April 2021
- Energy and Sustainable Development – November 2020
- Promoting Sustainable Agriculture – April 2019
- Manufacturing and Sustainable Development – May 2018
- Towards Education Supporting Sustainable Development in Egypt – May 2017

These conferences reflect the Institute's commitment to engaging with emerging global and national development challenges through informed and evidence-based discourse.

Innovation and Sustainable
Development June 2025

Scientific Events

Second: The Institute of National Planning Seminar

The Institute of National Planning Seminar is a regular event convened on the third Tuesday of each month. Its thematic focus is defined annually in alignment with the Institute's research priorities for the academic year. Each seminar brings together experts and specialists in the relevant research field, along with practitioners and non-academic professionals, to encourage dialogue and draw on practical executive experience. This multidisciplinary approach aims to enrich discussions, bridge theory and practice, and enhance the relevance and impact of the Institute's research agenda.

Scientific Events

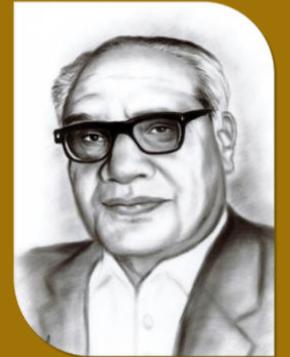

Second: The Institute of National Planning Seminar

During the 2022/2023 academic year, the Tuesday Seminar featured a series of distinguished sessions dedicated to honoring and engaging with the pioneers of national planning. These sessions highlighted their significant contributions and experiences, offering valuable insights that enriched the seminar's academic and practical dimensions.

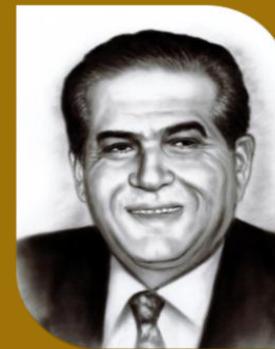

Pioneers of National Planning

**Prof. Dr. Ismail Sabry
Abdullah**
1925 - 2006

**Prof. Dr. Ibrahim
Helmy Abdel Rahman**
1919 - 1998

**Prof. Dr. Kamal El-
Ganzouri**
1933 - 2021

**Prof. Dr. Mohamed
Mahmoud El-Imam**
1924 - 2016

Scientific Events

The Institute of National Planning Salon

The Institute of National Planning Salon is a key intellectual forum initiated to convene a distinguished group of experts and thought leaders to deliberate on the major challenges and urgent issues confronting Egypt, the Arab region, and the global community. The Salon aims to explore practical solutions across political, economic, and social dimensions.

Examples of Salon Sessions Include:

- The Implications of Global Economic Crises on Developing Countries
- Political Economy of Climate Change and Environmental Policies
- Social Protection and the Role of the State in Times of Crisis
- The Future of Arab Regional Integration
- Artificial Intelligence and its Impact on Labor Markets

صالون معهد التخطيط

Scientific Events

Fourth: Scientific Follow-ups

It is held on the first Tuesday of every month, and all scientific centers collaborate in its execution through the participation of the scientific body and the supporting scientific body, presenting and discussing international reports, books, and recent research, and engaging in dialogue about them.

Scientific events

Fifth: Experts Meeting

It is one of the scientific events held on the second Tuesday of every month in the form of a roundtable discussion (involving a group of distinguished experts from inside and outside the institute) on a topic related to planning and development. The goal is to provide a shared scientific perspective that serves as a reference for decision-making by addressing and discussing various hot issues at the local, regional, and international levels, and highlighting the complexity and interconnectedness of these issues.

Scientific events

Sixth: The Young Researchers Seminar

The Young Researchers Seminar is held on the fourth Tuesday of every month, with all scientific centers collaborating in its execution through the participation of the supporting scientific body, presenting and discussing topics related to the economic, political, social, and environmental fields. This is done to exchange experiences between the institute's experts and guests.

Postgraduate Studies

INP offers three academic degrees for graduate studies, accredited by the Supreme Council of Universities

Postgraduate Studies

Academic Master's in Planning and Development

Aims of the Program

The Academic Master's in Planning and Development aims to prepare distinguished cadres in the field of planning and development, qualified to handle both international and local changes in their organizations, whether governmental or non-governmental, with the goal of fostering growth, improving efficiency, and increasing effectiveness. This is achieved by providing an innovative educational and training environment that blends scientific knowledge, expertise, and practical practices, while offering elements of creativity and future vision to achieve excellence.

Duration of the Program

Two academic years following the credit hour system with a total of 36 credit hours

Admission Requirements:

Applicants must hold a bachelor's degree from a university or scientific institute recognized by the Supreme Council of Universities, preferably in the field of Economics, with a minimum overall grade of "Good." Graduates from other disciplines—such as Commerce, Law, Media, Engineering, Science, Computer Science and Information, or Agriculture—or their equivalent degrees from accredited private universities and institutes may also be considered, provided they have achieved a minimum grade of "Very Good."

Additionally, candidates must successfully pass both the English language proficiency test and the computer skills assessment, as well as the personal interview.

Postgraduate Studies

Professional Master's in Planning and Sustainable Development

Aims of the Program

The Professional Master's in Planning and Sustainable Development aims to equip students with the skills needed to prepare, follow up on, and evaluate plans, taking into account the goals of sustainable development.

Duration of the Program

Two Academic years

Registration Requirements

Obtaining a bachelor's degree, license, or its equivalent from a recognized university or higher institute.

Passing the personal interview.

Achieving a score of 450 in the English language test (TORFL).

Approval from the employer.

03

Postgraduate Studies

Professional Master's in Monitoring and Evaluation

Aim of the Program

The program aims to develop the intellectual knowledge and skills of students in the field of monitoring and evaluation, as well as communication and teamwork skills, enabling them to monitor and evaluate projects, programs, plans, and policies.

Duration of the Program

The program lasts for two academic years, following the credit-hour system, with 48 credit hours.

Registration Requirements

Obtaining a bachelor's degree, license, or its equivalent from a recognized university or higher institute with an overall grade of no less than 'Good'.

Passing the personal interview.

Achieving a score of 500 in the English language test (TOEFL) or a score of 6 in the English language test (IELTS).

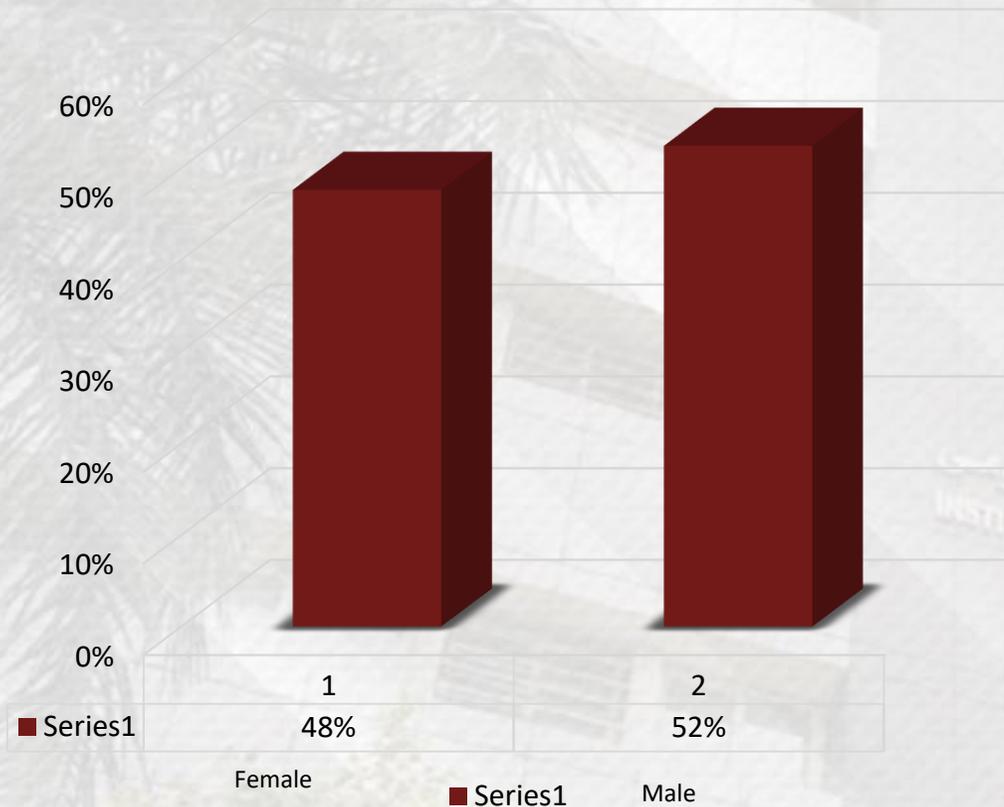

Professional experience (an additional advantage for acceptance).

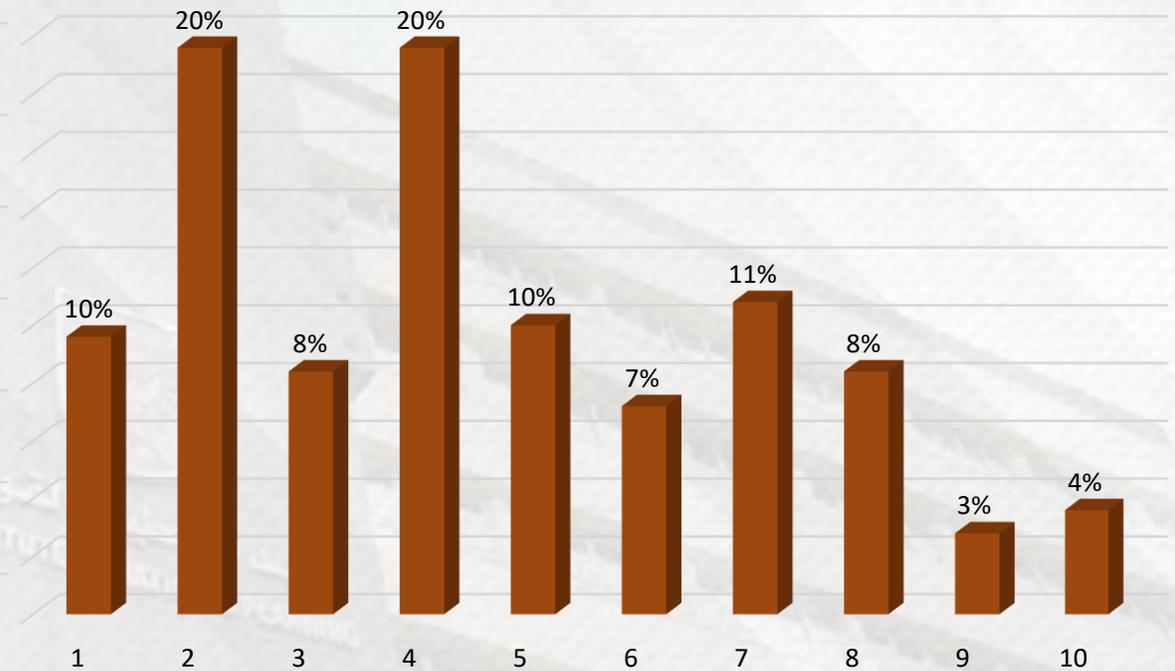

Postgraduate Studies

Students Enrolled in Postgraduate Programs (Academic – Professional)

Distribution of postgraduate students by gender

Distribution of postgraduate students by place of employment

House of Representatives -Banking sector -Public business sector -Government agencies -Public and economic authorities - Health and medical sector - Government ministries -Civil society organizations - Private sector - Research centers and Universities

Quality and Accreditation

The institute received accreditation from the National Authority for Quality Assurance and Accreditation of Education (NAQAAE) in 2022. The institute has also obtained several international quality standard certifications:

Quality Management System:

ISO 9001:2015 Educational/Research Institution

Management System:

ISO 21001:2018 Occupational Health and Safety

Management System:

ISO 45001:2018 Environmental Management System:

ISO 14001:2015

Training

Training

The institute offers a variety of specialized training programs tailored to the training needs of public and private sector organizations and institutions.

Some of these programs are implemented

**Online
Training**

or

**Face to Face
Training**

some others are implemented

at the headquarters of various organizations and institutions in the regions and different governorates of the Arab Republic of Egypt.

Training

Target Groups

The institute provides its training services to employees...

In addition to providing the opportunity for those interested from...

- Public national institutions
- Private national institutions
- National community
- Individuals

Arab countries
 African countries
 International bodies and organizations

Community Service

The institute contributes to supporting the planning capabilities of Egyptian, Arab, and African communities

Social Service

The institute provides a range of community service activities aimed at promoting culture and raising awareness of planning and development issues across various community groups. These activities include cultural, social, and scientific events, as well as discussions on significant and timely topics.

Several programs have been implemented for different community groups.

Educational workshops - Volunteer training programs

To spread culture and raise awareness of planning and development issues among different community groups.
